

# "I Own Nothing, Have No Privacy And Life Has Never Been Better"

by **Ida Auken**, nov 2016, [LINK](#)

"Welcome to the year 2030. Welcome to my city - or should I say, "our city." I don't own anything. I don't own a car. I don't own a house. I don't own any appliances or any clothes.

It might seem odd to you, but it makes perfect sense for us in this city. Everything you considered a product, has now become a service. We have access to transportation, accommodation, food and all the things we need in our daily lives. One by one all these things became free, so it ended up not making sense for us to own much.

First communication became digitized and free to everyone. Then, when clean energy became free, things started to move quickly. Transportation dropped dramatically in price. It made no sense for us to own cars anymore, because we could call a driverless vehicle or a flying car for longer journeys within minutes. We started transporting ourselves in a much more organized and coordinated way when public transport became easier, quicker and more convenient than the car. Now I can hardly believe that we accepted congestion and traffic jams, not to mention the air pollution from combustion engines. What were we thinking?

Sometimes I use my bike when I go to see some of my friends. I enjoy the exercise and the ride. It kind of gets the soul to come along on the journey. Funny how some things seem never seem to lose their excitement: walking, biking, cooking, drawing and growing plants. It makes perfect sense and reminds us of how our culture emerged out of a close relationship with nature.

In our city we don't pay any rent, because someone else is using our free space whenever we do not need it. My living room is used for business meetings when I am not there.

Once in a while, I will choose to cook for myself. It is easy - the necessary kitchen equipment is delivered at my door within minutes. Since transport became free, we stopped having all those things stuffed into our home. Why keep a pasta-maker and a crepe cooker crammed into our cupboards? We can just order them when we need them.

This also made the breakthrough of the circular economy easier. When products are turned into services, no one has an interest in things with a short life span. Everything is designed for durability, repairability and recyclability. The materials are flowing more quickly in our economy and can be transformed to new products pretty easily. Environmental problems seem far away, since we only use clean energy and clean production methods. The air is clean, the water is clean and nobody would dare to touch the protected areas of nature because they constitute such value to our well-being. In the cities we have plenty of green space and plants and trees all over. I still do not understand why in the past we filled all free spots in the city with concrete.

Shopping? I can't really remember what that is. For most of us, it has been turned into choosing things to use. Sometimes I find this fun, and sometimes I just want the algorithm to do it for me. It knows my taste better than I do by now.

When AI and robots took over so much of our work, we suddenly had time to eat well, sleep well and spend time with other people. The concept of rush hour makes no sense anymore, since the work that we do can be done at any time. I don't really know if I would call it work anymore. It is more like thinking-time, creation-time and development-time.

For a while, everything was turned into entertainment and people did not want to bother

themselves with difficult issues. It was only at the last minute that we found out how to use all these new technologies for better purposes than just killing time.

My biggest concern is all the people who do not live in our city. Those we lost on the way. Those who decided that it became too much, all this technology. Those who felt obsolete and useless when robots and AI took over big parts of our jobs. Those who got upset with the political system and turned against it. They live different kind of lives outside of the city. Some have formed little self-supplying communities. Others just stayed in the empty and abandoned houses in small 19th century villages.

Once in a while I get annoyed about the fact that I have no real privacy. Nowhere I can go and not be registered. I know that, somewhere, everything I do, think and dream of is recorded. I just hope that nobody will use it against me.

All in all, it is a good life. Much better than the path we were on, where it became so clear that we could not continue with the same model of growth. We had all these terrible things happening: lifestyle diseases, climate change, the refugee crisis, environmental degradation, completely congested cities, water pollution, air pollution, social unrest and unemployment. We lost way too many people before we realized that we could do things differently."

This blog was written ahead of the World Economic Forum Annual Meeting of the Global Future Councils.

Ida Auken is a Young Global Leader and Member of the Global Future Council on Cities and Urbanization of the World Economic Forum,

**World Economic Forum**

The World Economic Forum is the International Organization for Public-Private Cooperation.

The Forum engages the foremost political, business, cultural and other leaders of society to shape global, regional and industry agendas.

It was established in 1971 as a not-for-profit foundation and is headquartered in Geneva, Switzerland. It is independent, impartial and not tied to any special interests. The Forum strives in all its efforts to demonstrate entrepreneurship in the global public interest while upholding the highest standards of governance. Moral and intellectual integrity is at the heart of everything it does.

Our activities are shaped by a unique institutional culture founded on the stakeholder theory, which asserts that an organization is accountable to all parts of society. The institution carefully blends and balances the best of many kinds of organizations, from both the public and private sectors, international organizations and academic institutions.

We believe that progress happens by bringing together people from all walks of life who have the drive and the influence to make positive change.

**Young Global Leaders Alumni Community**

After a transformative personal and professional journey as a Young Global Leader, our members are invited to join the YGL Alumni Community.

As stewards of the Forum of Young Global Leaders, the YGL Alumni Community embodies and sustains the YGL ethos. The Community fosters members' continued growth as responsible leaders, strengthens lifelong connections, and drives solutions to complex social, environmental, and economic global issues.

As a group of over 600+ professionals across over 90 countries worldwide, YGL Alumni are engaged in activities that aim to improve the state of the world. They are CEO's of Fortune 500 corporations, in royal houses, in leading NGO's and national non-profits, public figures in civil society, sports personalities, and more.

**Global Shapers Community**

In 2011, Professor Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, founded the Global Shapers Community to empower young people to play an active role in shaping local, regional and global agendas.

The Global Shapers Community is a non-profit organization registered in Geneva, Switzerland and housed at the World Economic Forum. The Forum's contribution to the Shapers organization includes significant financial and in-kind contributions for operational support including staff time, technology tools and opportunities to interact and collaborate with its membership network.

Since 2017, Shapers have directly benefited almost 2 million people through locally-led projects and reached or mobilized more than 11 million people! They have volunteered 46,000 days, changed 37 policies and advanced all 17 Global Goals worldwide.
