

Corruption: Gov. Documents prove Bill Gates is Primary Funder of UK Medicine Regulator despite owning major shares in Pfizer & BioNTech

by *The Exposé*, Sep 15 2022, [LINK](#)

The Medicine & Healthcare products Regulatory Agency (MHRA) extended the emergency authorisation of the Pfizer / BioNTech mRNA jab in the UK to allow it to be given to children between the ages of 12 – 15 on the 4th June 2021.

At the time, the Chief Executive of the MHRA, Dr June Raine said the MHRA had “carefully reviewed clinical trial data in children aged 12 to 15 years and have concluded that the Pfizer vaccine is safe and effective in this age group and that the benefits outweigh any risk”.

We are left wondering if Dr June Raine and the MHRA have even read the results of the extremely short and small study. If they have then they would have seen that 86% of children in the study suffered an adverse reaction ranging from mild to extremely serious.

Just 1,127 children took part in the trial, however, only 1,097 children completed the trial, with 30 of them not participating after being given the first dose of the Pfizer jab. The results do not state why the 30 children did not go on to complete the trial.

The information is publicly available and contained within an FDA fact sheet which can be viewed here (see page 25, table 5 on-wards).

There was never any doubt that the MHRA would give emergency authorisation for the Pfizer / BioNTech vaccine to be used in children when you consider that a certain Mr Bill Gates owns shares in both Pfizer and BioNTech and is the primary funder of the MHRA.

The Bill & Melinda Gates Foundation bought shares in Pfizer back in 2002, and back in September 2020 Bill Gates ensured the value of his shares went up by announcing to the mainstream media in a CNBC interview that he viewed the Pfizer jab as the leader in the Covid-19 vaccine race.

“The only vaccine that, if everything went perfectly, might seek the emergency use license by the end of October, would be Pfizer.”

The Bill & Melinda Gates Foundation also “coincidentally” bought \$55 million worth of shares in BioNTech in September 2019, just before the alleged Covid-19 pandemic struck.

MHRA awarded over £980,000 for collaboration with the Bill and Melinda Gates Foundation and the World Health Organisation

The MHRA received a grant from the Bill & Melinda Gates Foundation in 2017 to the tune of £980,000 for a “collaboration” with the foundation. However, a Freedom of Information request which the MHRA responded to in May 2021 revealed that the current level of grant funding received from the Gates Foundation amounts to \$3 million and covers “a number of projects”.

Can we really trust the MHRA to remain impartial when its primary funder is the Bill & Melinda Gates Foundation, which also owns shares in Pfizer and BioNTech? We don't think so.

An investigation has revealed that the Bill & Melinda Gates Foundation is the primary funder of the UK's Medicine & Healthcare products Regulatory Agency, and the Foundation also owns major shares in both Pfizer and BioNTech.

Everywhere we look, we see substantial excess deaths in territories where c19 vaccination uptake has been the greatest.

Unvaccinated people are not dying at elevated rates.

Again, I ask that you take personal responsibility for sharing this with your network.

I cannot reach them. You're the only contact most of them have to an alternative (& in my opinion, correct) view of the world. Of the awful profile of the “vaccines”.

I have proven that even if the narrative around a new virus has been truthful, vaccination could never have been an appropriate response. Nor could they have been shown to be acceptably safe in the time available.

Yet most of the planet has been injected. We don't even know what's in them. Only what the manufacturers declared. Yet even they cannot know, because years were sliced out of the production R&D process.

I urge you to share this uncomfortable information because MAIN MEDIA ISNT GOING TO.

Best wishes

Dr. Mike Yeadon
