

# Confirmed for First Time: Vaccines Cause Myocarditis Deaths, Says Oxford Study

by Dan Skorbach, Frontline Health, Sep 16 2022, [LINK](#)

In rare cases, a SARS-COV-2 infection can cause myocarditis. COVID-19 vaccines are also known to cause it. But when you compare the two—a COVID-19 infection versus a COVID vaccine—the medical consensus is that an infection is 14 times more likely to cause myocarditis. But a new study is challenging these numbers.

A new University of Oxford study published in the American Heart Association journal Circulation found that a COVID-19 vaccine is actually four times more likely to cause myocarditis in men under the age of 40 than a COVID-19 infection. This is also the first study that has acknowledged that people are actually dying from vaccine-induced myocarditis.

To this day, the CDC has not reported any myocarditis deaths from COVID-19 vaccines. The agency also says that COVID-19 vaccine myocarditis is “generally mild.” But when we looked at the numbers in this report, it doesn’t look so mild at all, at least for certain age groups.

# 30 Years of Secret Official Transcripts Show UK Government Experts Cover Up Vaccine Hazards

by Rhoda Wilson, The Exposé, Sep 21 2022, [LINK](#)

A 2012 article published by Child Health Safety has resurfaced. The article detailed a paper published by a courageous doctor and investigative medical researcher, Lucija Tomljenovic, who dug up the dirt on 30 years of secret official transcripts of meetings of UK government vaccine committees and the supposedly independent medical “experts” sitting on them with their drug industry connections.

Lucija Tomljenovic, PhD, is a research scientist with the Neural Dynamics Research Group,

Department of Ophthalmology and Visual Sciences at the University of British Columbia, Canada. She has extensive experience investigating the safety of vaccine adjuvants.

As Food Freedom News’ Andrew Baker noted in an article the following year, the secret official documents show that government experts have:

1. Known the vaccines don’t work.
2. Known they cause the diseases they are supposed to prevent.
3. Known they are a hazard to children.
4. Colluded to lie to the public.
5. Worked to prevent safety studies.

“Those are the same vaccines that are mandated to children in the US,” Baker wrote.

We have republished Child Health Safety’s article below. The original is archived here, [LINK](#)
