

Welcome & Happy New Year!

Klaus Schwab from the WEF, World Economic Forum, has written a book *The Great Reset*. He declares "*You Will Own Nothing*". It is not your largest government pension fund nor the government in a democracy that "*Will Own Everything*". You will not have any influence on how they will use the funds and the fruits of your labor.

Who is it then? Who will "Own Everything"? Our suspicion is that the 0.1% who own most of the Earth's assets now simply want to take over what they have not usurped yet. The intended owners of "Everything" must be the globalists who already are systematically looting the world's population. How they loot the world and which methods they use, we try to explain that in *Vakstidende*. The

Prosperity Party – Earth Freedom Knowledge now believes that the time has come for a showdown with the welfare system, which is being hijacked into a Bolshevism 2.0 with all power centralized with some unelected technocrats, just as we are already seeing it in the Commission in the EU, who are not elected by the people. The economic power is with the privately owned and privately controlled international organizations, whose "*recommendations*" our politicians "*simply follow*". Therefore, the time has now come for an economic system that, for the first time in world history, reverses the flow of money from going up to the "*top of the pyramid*" to instead down to all people in the world. The time has come to go from a "*welfare system*" to a Prosperity System. To a system where everyone has a dignified life, where people can freely keep all their income. The Earth is

incredibly abundant. There is plenty for everybody. If the people with power and influence really were serious about doing something for the climate, then they would support the ideas of the Prosperity Party, because all empirical evidence supports, that with prosperity you get a cleaner country. Because you can simply afford the costs to clean up the production of goods and the way we live.

The Prosperity Party has some excellent ideas for how the state can easily get even more income without taxing people.

We hope you will enjoy the newspaper, and may 2023 be the year where good, light and noble forces, intentions and actions will form the culture around us.
