

Oxfordshire County Council Pass Climate Lockdown 'trial' to Begin in 2024

Residents will be confined to their local neighbourhood and have to ask permission to leave it all to *'save the planet'*.

Oxfordshire County Council yesterday approved plans to lock residents into one of six zones to 'save the planet' from global warming. The latest stage in the '15 minute city' agenda is to place electronic gates on key roads in and out of the city, confining residents to their own neighbourhoods.

Under the new scheme if residents want to leave their zone they will need permission from the Council who gets to decide who is worthy of freedom and who isn't. Under the new scheme residents will be allowed to leave their zone a maximum of 100 days per year, but in order to even gain this every resident will have to register their car details with the council who will then track their movements via smart cameras round the city.

Communism will make the weather better

Oxfordshire County Council, which is run by Labour, the Liberal Democrats and the Green Party, secretly decided to divide-up the city of Oxford into six '15 minute' districts in 2021 soon after they were

elected to office. None of the councillors declared their intention of imprisoning local residents in their manifestos of course, preferring to make vague claims about how they will 'improve the environment' instead.

Every resident will be required to register their car with the County Council who will then monitor how many times they leave their district via number plate recognition cameras. And don't think you can beat the system if you're a two car household. Those two cars will be counted as one meaning you will have to divide up the journeys between yourselves. 2 cars 50 journeys each; 3 cars 33 journeys each and so on.

Under the new rules, your social life becomes irrelevant. By de facto Councils get to dictate how many times per year you can see friends and family. You will be stopped from fraternising with anyone

outside your district, and if you want a long distance relationship in the future, forget it, you are confined to dating only those within a 15 minute walk of your house.

A single person's life will be at the mercy of Communists in central office, dictating the same type of draconian rules we had to avert the *last* crisis, a mild flu virus so deadly 80% of people didn't even know they had it.

An entirely new social structure is being imposed on Oxford's residents (and more cities are to follow) under the lie of saving the planet. but what it really is, is a plan for **Command and Control**. There will be permits, penalties and even more ubiquitous surveillance. Council officials will determine where you can go and how often, and will log every time you do. 15-minute cities, or 15 minute prisons?
