

Mons, Belgium, according to a written complaint, twenty-five per cent of the men received by the French were "dechets," or garbage.

In July and August, as US Quartermaster Littlejohn signalled to Eisenhower in due course, the Army food reserves in Europe grew by thirty-nine percent.

On August 4, a one-sentence order signed "Eisenhower" condemned all prisoners of war still on hand in the US camps to DEF status: "Effective immediately all members of the German forces held in US custody in the American zone of occupation in GERMANY will be considered as disarmed enemy forces and not as having the status of prisoner of war." No reason was given. Surviving weekly tallies suggest the dual classification was preserved, but, for the POWs now being treated as DEFs, the death rate quadrupled within a few weeks, from .2 percent per week to .8 percent.

Longtime DEFs were dying at nearly five times that rate. The official "Weekly PW and DEF Report" for the week ending Sept 8, 1945, still exists in the US National archives in Washington. It shows an aggregate of 1,056,482 prisoners being held by the US Army in the European theatre, of whom about two-thirds are identified as POWs. The other third - 363,587 men - are DEFs. During that one week, 13,051 of them died.

In November, 1945, general Eisenhower succeeded George Marshall as US Army chief of staff and returned to the US. In January, 1946, the camps still held significant numbers of captives but the US had wound down its prisoner holdings almost to zero by the end of 1946. The French continued holding hundreds of thousands through 1946, but gradually reduced the number to nothing by about 1949. During the 1950's, most non-record material relating to the US prison camps was destroyed by the Army.

Eisenhower had deplored the Germans' useless defence of the Reich in the last months of the war because of the waste of life. At least ten times as many Germans - undoubtedly 800,000, almost certainly more than 900,000, and quite probably over 1 million - died in the French and American camps as were killed in all the combat on the Western Front in northwest Europe from America's entry into the war in 1941 through to April, 1945.

Mr. James Bacque researched the post-war period in Germany. He meticulously researched the Rhine Meadow camps in the "American" and French zones and determined the true number of dead. The Zionist clique around Eisenhower, Morgenthau and Baruch carried out a holocaust on the German soldiers in 1945-1946. The walking German skeletons and piles of corpses were then also called Jewish and so the Holocaust on the Jews was propagated with false photos and films - by Mr. Hitchcock.

Warning: Gates-Funded Factory Breeds 30 Million Mosquitoes a Week for Release in 11 Countries

Billionaire Bill Gates, who is funding the project, "assures" us it's not a scene from a horror movie

by Amy Mek, RAIR, 27. Aug. 2022, LINK

Inside a two-story brick building in Medellín, Colombia, scientists work in muggy labs breeding 30 million genetically modified mosquitoes weekly in labs. They tend to the insects' every need as they grow from larvae to pupae to adults, keeping the temperature just right and feeding them generous helpings of fishmeal, sugar, and, of course, blood. They are then released into the wild in 11 countries.

Billionaire Bill Gates, who is funding the project, assures us it's not a scene from a horror movie. "The factory is real. And the mosquitoes that are released do not terrorize the locals. They help save and improve millions of lives." Just as his 'covid vaccines' have 'saved' millions of lives or his 'previous vaccination projects have left thousands of women sterile in India and Kenya. Or even his Polio vaccines have caused paralysis, seizure, and febrile convulsions in Sub-Saharan Africa, Afghanistan, Congo, and the Philippines.

Wolbachia Bacterium

"The mosquitoes grown in this factory carry the Wolbachia bacterium, which prevents them from transmitting dengue and other viruses - including Zika, chikungunya, and yellow fever - to humans. By releasing them and breeding them with wild mosquitoes, they spread the bacteria, reducing virus transmission and protecting millions of people from disease," claims Gates - just as his 'covid vaccines' have 'reduced' virus transmission and have 'protected' millions of people from disease.

Research conducted in Indonesia has shown that mosquitoes carrying Wolbachia offer 77 percent protection against dengue fever, and 86 percent are effective against hospitalization. Just like his 'corona vaccines' offer almost 100 percent 'protection' against covid and hospitalization.

11 countries

The mosquitoes are released in Colombia, Brazil, Mexico, Indonesia, Sri Lanka, Vietnam, Australia, Fiji, Kiribati, New Caledonia, and Vanuatu - eleven countries total.

Gates plans to breed hundreds of millions of Wolbachia mosquitoes. Did Gates and his researchers consider all the variables that are likely to occur with a program where a new vector of spreading a bacteria by an insect that bites humans and other animals and, in the process, injects that bacteria into them? Where is the one, two, five, and ten-year report on the safety of such a program from a controlled environment?

What could possibly go wrong?

"Boo"
