

# No To Whitewashing Of Money With People As Cannon Fodder!

## Stop the Globalists' War in Ukraine

- by Ole Skjold, JFK21, Feb, 2023

Currently the most dangerous challenge for us, Danish people, and for the whole world is the danger of an outbreak of a World war caused by the problems in Ukraine.

A quick review of the reasons for the problems actually started in the year 1991 in connection with the dissolution of the Soviet Union. Russia and The United States (NATO) were negotiating conditions for the unification of East- and West Germany and for a lasting peace, in a much controversial agreement between United States Mr. James Baker and Mr. Gorbachev of Russia. The agreement was that the United States (NATO) under no circumstances would extend their influence eastward, i.e. no expansion of NATO towards the Visegrad countries or any other Eastern European countries, that previously belonged to the Soviet Union. Nevertheless, the first enlargement of 3 countries were already done by 1999 and was in 2004 further extended by 7 countries. In fact, our previous prime minister for Denmark, Anders Fogh Rasmussen organized some of these enlargements. But that did not satisfy The United States and NATO, so in 2004 we experienced the so-called Orange revolution in Ukraine, which appeared to have been organized and financed by the American, originally Hungarian, Jewish billionaire George Soros. Nevertheless, the Russian friendly president Juschtsjenko won the election and served until 2010, followed by president Janukovitjs.

During 2013 the EU and Janukovitjs were negotiating an agreement between EU and Ukraine. The EU demanded that Ukraine would stop or considerably reduced their cooperation with Russia, which Janukovitjs could not accept. So by the end of 2013 demonstrations started in Ukraine and continued until a culmination on February 20, 2022, where it lead to confrontation and demonstration between supporters and opponents of the agreement. Snipers were shooting into the crowd of both supporters and opponents and created chaos all over Ukraine. Janukovitjs was forced to flee the country and the new government, installed by the American, introduced order and conditions especially towards the Russian speaking population in the eastern part of Ukraine. There were demonstrations all over and very violent behavior by supporters of the new government, especially against the population in the eastern Ukraine. Among others, very violent riots in Odessa, where about 50 Russian speaking demonstrators were lured into a union building, that were set on fire. Everybody who tried to escape the fire

were murdered and the rest perished in the flames. Search under 'Arson in Odessa'.

The unrest and riots continued over the next 8 years with persecution and murder of Russian speaking people in the eastern part of Ukraine. And the Ukrainian military and so called Nazi gangs murdered 14.000 Russian speaking Ukrainians during that period.

Over many years, before these events, the Americans were working very hard to turn peoples minds against Russia and towards the west and EU.

Victoria Nuland, the Assistant Secretary of State with responsibility for East European States has in fact confirmed that the United States have invested \$ 5 billion in this project. She is also known for in a telephone conversation with the American embassy in Poland to have said: "Fuck the EU".

During the period 2014 and 2022 our previous prime minister, Anders Fogh Rasmussen has been an advisor for the government of Ukraine. The task has probably not been advising and guidance into creating good and acceptable relations to the Russians!!! Wandering how many millions he made on these

consultancies. I wonder if he has paid tax on this ..... or what?

Of course the Russians have been helping the Russian speaking East Ukrainians, but been very reluctant by taking steps to crossing the border. But that then happened on February 24, 2022 caused by provocations of the Ukraine's as well as assisting NATO both with weapons, advising and 'volunteer' soldiers. Some of these were captured prisoners and were apparently executed with short trials and others have fallen in acts of war, so it is well known

that both Americans, Canadian, French and English citizens have taken part on the side of Ukraine. It is unknown exactly why February 24, but some think maybe because of extreme provocations by the Ukraine army. And Russia has presented evidence, that NATO/USA had established and operated 46 laboratories, which have researched and developed chemical and/or biological weapons and so you could risk attack by these.

Our media are telling us, that Russia have been attacking a poor, innocent country. I think we should really modify that that perception and agitation and look at the real facts.

Are the Russians really such stupid pigs because they defend themselves and their fellow compatriots?

Are the Russians really the worst criminal that the rest of the world has to be aware of and that the west (we) have to invest billions and billions in weapon to defend us against?

Did you really think about how many countries we have destroyed since 9/11?

Afghanistan, Iraq, Libya, Syria, Yemen, African states and more. Purpose: To steal and oppress? To create democracy? Mention just one example.

Please, use your energy and fortunes to create peace. You cannot do that with weapons. Maybe it is not possible with our Danish prime minister anyway. Well, then let us get rid of her, maybe NATO can use her - or Zelenskyj - in a trench!!!.
