

**Deputy Managing Director IMF Bo Li :
“A CBDC can allow government agencies and private sector players to program, to create smart contracts, to allow targeted policy functions.”**

what is happening right now in Europe. The following comes from the official website of the European Parliament..., [LINK](#)

To restrict transactions in cash and crypto assets, MEPs want to cap payments that can be accepted by persons providing goods or services. They set limits up to €7000 for cash payments and €1000 for crypto-asset transfers, where the customer cannot be identified.

Ultimately, they will just keep lowering the limits until the use of cash is almost completely eliminated. Everyone will be slowly but surely forced on to the new digital system, and it will be a system that they control with an iron fist. And most people will willingly go along with it. These days, most people are just scraping by from month to month and one recent survey found that 70 percent of all Americans are “financially stressed” [LINK](#), at this point...

Inflation, economic instability and a lack of savings have an increasing number of Americans feeling financially stressed. Some 70% of Americans admit to being stressed about their personal finances these days and a majority — 52% — of U.S. adults said their financial stress has increased since before the Covid-19 pandemic began in March 2020, according to a new CNBC Your Money Financial Confidence Survey conducted in partnership with Momentive.

Most Americans simply do not care that these new digital currencies could open a door for great tyranny. They just want to be able to pay the bills and take care of their families, and if our politicians tell them that this new system is good for the economy they will be all for it. But those of us that are awake know that more globalism doesn't lead anywhere good. Concentrating even more power in the hands of the international elite is always a bad idea, and hopefully we can start to get more people to understand this.

Michael's new book entitled “End Times” is now available in paperback, [LINK](#), and for the Kindle on Amazon.com, [LINK](#), and you can check out his new Substack newsletter right here, [LINK](#)

A DIGITAL ID IS NOT TO IDENTIFY YOURSELF

IT IS TO TRACK AND TRACE YOUR EVERY MOVE

This is scary

This is my guess what will happen:

- Editorial Comment
by Mads Palsvig

I estimate that they will use Central bank controlled digital currency to make an Orwellian dystopian dictatorship, where everyone who has nothing to say is satisfied, because all criticism of the government will be banned. Where everyone who trusts, that vaccines help also does not care that everyone should be forcibly vaccinated, because they have taken the vaccine because it “is safe” and “protects against infection”. Where all vegans do not care, that you are not allowed to eat meat, and everyone who obeys everything does not care that system critics are not allowed to travel more than a few kilometers from their de facto “house arrest”/prison, as long as they themselves can come to a concert/beach holiday once a year.

When the cash is gone, the state can not only see everything you spend money on, they can also decide what you are allowed to spend your money on. They can simply code each person's account with individual permissions and individual restrictions. Thus, “good” citizens will be able, for example, to travel, eat meat and go to cultural events, while people who do not follow the “recommendations” of the government and the health authorities will suddenly not be able to spend their money.

An example from real life, right now:

Russians living in the West have had their bank accounts expropriated/frozen, Russian tourists with valid visas cannot use their credit cards in Denmark and they cannot even exchange the euros they brought with them as soon as they show their Russian passport, the Danish bank says: “Njet!”

This is the case everywhere in Western Europe. A resident Russian, who has lived in Denmark for 30 years and has been married to a Dane, was told that the reason they did not expropriate/freeze his/her account was that there was only EUR 1000 in the account. Russians, who love the West, want their children to grow up in the West, have bought a house or an apartment, have had their bank accounts blocked/closed in the west, without warning and the

possibility of taking the money out and back to Russia. Their deposits are simply expropriated/“frozen”. They can't even make wealth management and, for example, sell their shares if they think the market will go down.

At the same time, 96% of Western companies are still in Moscow, no restrictions on them, no consequences for companies that violate the sanctions, only on people of flesh and blood. Russians living in the West, Danes and for that matter of all nationalities, cannot send money to Russia to their family and friends, cannot send a package and cannot even travel from Western Europe to Russia, but must travel via Istanbul or Dubai. But as mentioned above, those people who are not Russians or have Russian family are totally indifferent and do not lift a finger. And the deep state knows that. They systematically take away our freedoms one at a time. People are amazingly passive.

With the introduction of the central bank digital currency: then the dictatorship is an inevitable reality.

Thus, the next time they call the annual flu for “corona” or spread a biological weapon and call it a pandemic, then the state will de facto be able to forcibly vaccinate the entire population. They otherwise simply just close your account, if you don't comply. The most frightening thing is that those who want a central bank controlled currency believe depopulation is a good thing and that humans are “useless eaters”. For example, one of the effects of the corona vaccination is that fertility has decreased significantly. And there is an excess mortality in the west of over 10% since the corona vaccination program started.

VelstandsPartiet.dk/The Prosperity Party, [LINK](#) is 100% against central bank controlled currency as long as it can be designed to limit the user's options and completely full personal control of the money.

Digital currency is simply dictatorship on steroids.

My guess is that there will be no economic collapse. The Deep state will bribe people to give up their cash and the freedom cash gives people. My guess is that people will get, for example, EUR 2,000 a month in a digital currency that cannot be saved, but must be used every month.

People will accept the bribe, because after all they are not critics of the system/have nothing to say/for all the vaccines of the state/do not eat meat anyway/ or are not Russians.

And when they have accepted the bribe..... then they are hooked.....”mwahahahaha”, laughs “you know who”.
